## **Blue Chip works on Post Implementation Support and Customizations**

### **Business Need**

The client based in India delivers precision-engineered hydraulic cylinders, components and solutions. The project main motive is to enter sales returns, rejections, reason for rejection, status of claims, rectification and reconditioning of the defective material with value quantity and scrap realization value. The client will be getting different types of rejection like Customer rejection, Field rejection etc.

### **SOLUTION**

Blue Chip been awarded with the contract of studying, consulting and deliver SAP as a Solution that is built from the ground to address the business needs of company who are looking for an affordable, yet powerful business application. The Project addressed

- FI, MM and SD modules
- Documenting and testing
- Production support

### **Our Approach**

The above Business Need is related to the return of rejected material from various customers, in which the integration of various General Ledger accounts and Customer accounts related to MM and SD are mapped. The material valuation as per the requirement of the company is modified and taken care to give financial effect correctly. Entire Customizations are done by ABAP programming.
